

## Year 2 Homework

Out: Wednesday 3<sup>rd</sup> October Due for Monday 8th October

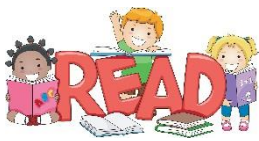

This week the homework activity is completing additions of tens and ones. We have been practising in class this week using tens and ones to represent the value of each digit. An example of how to set out the work is given. Many thanks for your support with this.

Please learn spellings these are in your child's book and on the website, click Spell Anywhere link.

Class times table for Monday test **10 times tables** for example  $6 \times 10 = 60$ ,  $8 \times 10 = 80$ .

Reading 3 times at home, please ensure the yellow reading diary is completed each week, it really helps us to build a better understanding of your child's reading. We will remind your child to swap their reading books during reading group time, but they are welcome to swap on other days too.

### Maths

**Passport** Finally the children will have their individual Passport test on Wednesday morning. Each child has been given an individual practise sheet for their target. Please practise for 2 minutes each day and record the number of correct answers in the grid at the bottom of the page.

Thank you for your support

Mrs Hawkes and Mr Williams

Additions of tens and onesExample question  $21 + 14 = 35$ 

T	O
	•
	••
3	5

Represent each number using base ten to show the value of the tens and ones.

Then add up each column to find the total tens and ones.

Now have a go at these additions. Remember you need to represent the number using your base ten drawings!

$13 + 25$
